What is a School-Based Health Program?

A school-based health program is a shared commitment between a community’s schools and health care organizations to support students’ health, well-being, and academic success by providing preventative, early intervention, and treatment services where students are - in school.
THE BIG SIX
The Show-Me School-Based Health Alliance has expanded the types of school-based health programs to represent the six types of programs that exist in districts throughout Missouri.

1. Comprehensive School-Based Health Center
Comprehensive School-Based Health Centers are a partnership between schools and community health organizations that deliver primary health care, behavioral/mental health care, oral care, and vision care coordinated by the center—even if they are delivered by different providers.

2. School-Based Health Center
School-Based Health Center (SBHC) programs are partnerships between schools and community health organizations that deliver primary health care, at minimum, through a fixed site on a school campus.

3. School-Linked Health Care
School-Linked Health Care programs are linked with schools to coordinate and provide health care for students. Services are delivered off campus through a fixed site near the school.

4. School-Based Mental Health Program
School-based mental health programs are partnerships similar to SBHCs but only provide behavioral/mental health.

5. Mobile Health Care
Mobile Health Care programs are without a fixed site that rotate a health care team through a number of schools, including mobile van/bus/clinic on wheels that parks on or near school property/campus.

6. Telehealth
Telehealth programs deliver 100% of school-based health care services using telemedicine technology.
Organizations Represented Today

School-Based Health Programs During COVID-19

- National landscape of SBH programs
- Landscape of SBH programs in Missouri
- Role of SBH programs now & throughout school re-entry
Role of SBH Programs Throughout School Re-Entry

- Closing the immunization gap critical to re-opening schools
- Providing COVID testing if approved (or any other diagnostic testing)
- Supporting tracking cases & quarantine efforts to reduce exposure & spread
- Providing preventative & urgent care for chronic health conditions (i.e. asthma), which reduces ED visits
- Providing medical supplies (i.e. PPEs, thermometers, etc.) that schools/school nurses cannot currently access
- Supporting the establishment of school cleaning & sanitizing procedures
- Educating staff on the symptoms of COVID-19, helping to establish protocols for screening, assessing symptoms, and providing basic health education
School-Based Health Programs During COVID-19

- National landscape of SBH programs
- Landscape of SBH programs in Missouri
- Role of SBH programs now & throughout school re-entry
- MOSBHA support
  - Federal & state advocacy efforts
  - Support for school district/community partnerships
  - Re-entry planning
Communication During COVID-19

- How is your organization communicating with staff? Partners? Students & families?
  - How is this going? What’s working? What’s not?

- What challenges are you facing and anticipate facing in communicating moving forward?
Communication Resources

• Trauma-informed communication + Decision Making Guide for Schools + School Districts from Alive & Well
• Risk Communication Field Guide Questions & Key Messages from Association of State and Territorial Health Officials
• Talking with Children about Coronavirus Disease 2019 from Centers for Disease Control & Prevention
• Social and Emotional Learning Resources During COVID-19 from CASEL
• MOSBHA COVID-19 Resources
• Current Funding Opportunities
