Listening & Learning Session:
School & School-Based Health Program Re-Entry
Friday, May 22, 2020
**Show-Me School-Based Health Alliance of MO**

**Mission:** We support communities in building and sustaining quality school-based health programs.

**Target Audience**
School districts, community stakeholders, and the healthcare providers that serve them.

- **Access to Resources & Best Practices**
- **Advocacy & Coalition Building**
- **Data Collection & Evaluation**
- **Peer-to-Peer Networking Across MO Programs**
- **Technical Assistance**
- **Training & Education**
THE BIG SIX

The Show-Me School-Based Health Alliance has expanded the types of school-based health programs to represent the six types of programs that exist in districts throughout Missouri.

1. Comprehensive School-Based Health Center
Comprehensive School-Based Health Centers are a partnership between schools and community health organizations that deliver primary health care, behavioral/mental health care, oral care, and vision care coordinated by the center—even if they are delivered by different providers.

2. School-Based Health Center
School-Based Health Center (SBHC) programs are partnerships between schools and community health organizations that deliver primary health care, at minimum, through a fixed site on a school campus.

3. School-Linked Health Care
School-Linked Health Care programs are linked with schools to coordinate and provide health care for students. Services are delivered off campus through a fixed site near the school.

4. School-Based Mental Health Program
School-based mental health programs are partnerships similar to SBHCs but only provide behavioral/mental health.

5. Mobile Health Care
Mobile Health Care programs are without a fixed site that rotate a health care team through a number of schools, including mobile van/bus/clinic on wheels that parks on or near school property/campus.

6. Telehealth
Telehealth programs deliver 100% of school-based health care services using telemedicine technology.

Overview for Today’s Session

- SBH program re-opening guidance
- Listening & learning discussion
  - School & SBH Program Re-Entry Planning
    - Dr. David Campbell, President & CEO, iFM Community Medicine
    - Annette Campbell, RN, BSN, MPA, Director of Score 1 for Health, Kansas City University
- Resources
- Q&A
• Centers for Disease Control & Prevention *Interim Guidance for Schools & Child Care*

• American Academy of Pediatrics *COVID-19 Planning Considerations*

*Template to guide local discussion; NOT a one size, fits all document. Protocols will change as local conditions change.*
Role of SBH Programs to Support School Re-Entry

- Closing the immunization gap critical to re-opening schools
- Providing COVID testing if approved (or any other diagnostic testing)
- Supporting tracking cases & quarantine efforts to reduce exposure & spread
- Providing preventative & urgent care & behavioral/mental health services to address gaps & reduce ED visits
- Providing medical supplies (i.e. PPEs, thermometers, etc.) that schools/school nurses may not be able to access
- Supporting the establishment of school cleaning & sanitizing procedures
- Educating staff on the symptoms of COVID-19, helping to establish protocols for screening & assessing symptoms & providing basic health education
Preliminary Guidance for SBH Programs Throughout School Re-Entry

• Support & Collaboration with School District Partners
  • Collaborate early and often on re-entry planning—both for school re-entry planning and for decisions related to SBH program operations.
  • Determine health priorities—immunization gap, mental health needs, etc.
  • Determine how the SBH program will support suspected COVID-19 cases, screening efforts, and isolation requirements.
  • Partner to prepare for students in crisis and who have experienced grief & trauma.
Preliminary Guidance for SBH Programs Throughout School Re-Entry

• Operations & Physical Space
  • Create and/or adapt protocols for COVID-19 screening.
  • Develop plan for social distancing of students & staff.
  • Determine if program will be testing for COVID-19 or referring to a testing site.
  • Understand HIPAA/FERPA and privacy/confidentiality related to COVID-19 reporting, tracking, isolation, risk reduction, etc.
  • Evaluate the role of telemedicine in your program.
Preliminary Guidance for SBH Programs Throughout School Re-Entry

- **Infection Control**
  - Develop or adapt written protocol for disinfecting the program space using EPA-approved cleaning products.
  - Procure adequate PPEs.
  - Update protocols to address asthma exacerbation without the use of a nebulizer.
  - Promote prevention of infection, including handwashing.
Preliminary Guidance for SBH Programs Throughout School Re-Entry

- **Addressing Student Needs**
  - Develop screening procedures & referral resources for social determinants of health.
  - Heighten efforts to collect signed parent consent forms.
  - Communicate with school district to parents about services offered and measures taken to assure infection control.

- **Community Partnerships**
  - Partner with local health authorities & other community/regional efforts.
  - Collaborate with school social workers to create referral resources.
Discussion

• Dr. David Campbell, President & CEO, iFM Community Medicine

• Annette Campbell, RN, BSN, MPA, Director of Score 1 for Health, Kansas City University

• How has your organization or school district partnered for re-entry planning thus far?
• What are you anticipating your largest challenge to be?
• How are you planning for the unknown at this point?
